

If The Problem Were a TV Show

1. Describe a problem that you would like us to consider together:

2. If this problem were a TV show, what would be the name of the show?

3. How would you describe the TV show in TV Guide? What would be the plot? The setting? Who would be the main characters and the supporting characters? What type of show would it be?

4. If this problem were solved, you could create a new TV show that would be a spinoff of the old series. How would the spinoff show be the same? How would it be different?

5. How would you describe the **new** TV show in TV Guide?
