

The Teasing Thermometer

Everyone gets teased by someone at some time. Harmless teasing can be a friendly way of showing affection, but malicious teasing can be cruel and hurtful.

Look at the pictures below and decide whether the teasing depicted in each picture is friendly or cruel. Show your decision by filling in the mercury level on the thermometer next to each picture. The more friendly the teasing, the lower the mercury level will be. The more cruel the teasing, the higher the mercury level will be.
